Flaming Star: Type and type development in the life and music of Elvis Presley

Presented by Mary McGuinness ENFP

Take a journey through the life and music of Elvis Presley to explore his personality type and his personality development. Look behind the myth and the media hype to find the real Elvis. A find out why his career choice was a natural choice for his personality type! Using the book *Functions of Type* by Gary and Margaret Hartzler Mary will look at each of Jung's eight functions to show evidence of the level of development of each function in Elvis. This approach will provide you with a model for evaluating the level of development of each function in yourself or your clients. So, put on your blue suede shoes, gyrate those hips and rock on over to Lidcombe for some learning and some fun!
