

Feed back summaries from the May Event – 16 TYPES presented by Marian Power

Thank you for your contributions to the feedback summary for evening we spend learning about 16 Types. Unfortunately – all the photos I took that were to accompany this were lost along with my camera.

Marian's presentation was engaging and interesting. It was a great opportunity to find out about some new trends in type. - Kim

My highlights were:

New people

New ways of looking at type

New reports look interesting

Price looks reasonable

Great food and wine

Wonderful atmosphere

Excellent organisation!! – Jackie

I really enjoyed Marian's presentation, but the group activity (or language around), I had difficulty with - maybe I wasn't listening. So if I was doing that activity, I'd need to be very clear about exactly what was required of the participants and what outcome was needed.

I loved the filter activity and will use it in my work, as well as the BLM reminder.

Thank you. Jude

Good to see Temperament back in the Type arena and to see the latest developments around it.

Jim

As a visitor/new attendee at the AusAPT May meeting, I found Marian's presentation of the 16Types very interesting & informative -Wendy

Good to hear a very well presented talk by Marian, and to be part of a group of such interesting people. Linc

I found the session interesting in terms of continuing to look at oneself and innate and learned behavior. I also found it challenging to pigeon hole myself, if you like, into one statement/ type on the board. I do not see myself and did not see myself as being all like the one but oscillating between 2. I hope this makes sense. Vivienne

I enjoyed the presentation by Marian and the diversity of type within the group which made for some interesting discussions. The red wine was excellent as always!"
